Published Online: 30 June 2026.

It is with a strong commitment to academic excellence that we present Volume 2, Issue 2 (June 2026) of the *Journal of Collective Sciences and Sustainability*.

For this issue, the Editorial Board regrets to inform our readers that no articles have been accepted for publication, although several submissions were received during the publication cycle. This outcome reflects the journal's rigorous editorial and peer-review standards, which emphasize originality, scientific merit, methodological rigor, and relevance to the interdisciplinary scope of collective sciences and sustainability.

We remain steadfast in our commitment to maintaining the highest standards of scholarly publishing. We firmly believe that preserving the integrity, credibility, and quality of the scientific record is of greater importance than maintaining publication volume. Accordingly, we have decided not to publish articles that do not satisfy our established editorial and peer-review criteria.

We sincerely thank all authors who entrusted us with their work and acknowledge the valuable efforts of our reviewers and Editorial Board in ensuring a fair, constructive, and thorough evaluation process. We encourage researchers to continue submitting innovative, impactful, and high-quality contributions that advance knowledge in collective sciences, sustainability, interdisciplinary research, environmental stewardship, social innovation, and related fields.

We appreciate the continued support and confidence of our authors, reviewers, readers, and the broader academic community. We look forward to presenting future issues featuring outstanding research that reflects the journal's mission of fostering scientific excellence and sustainable development.

Regards

Dr. Amit Joshi
